

Shreeji Components

Located in Jamnagar, Shreeji Components delivers high-quality brass parts. We serve diverse industries with unmatched precision and zero defects.

Our Legacy: 30 Years of Excellence in Manufacturing

Established in 1995

Based in Jamnagar, Gujarat a hub of brass Industry known across the world.

Professional manufacturing

Operated by dedicated skilled engineers with deep domain expertise since years.

Commitment to quality

Focus on customer satisfaction and consistent excellence in quality of complex parts that we manufacture.

Core Competencies: Precision at Scale

Large-Scale Manufacturing

Capacity for intricate brass parts in high volume without compromising on quality

Advanced Machinery

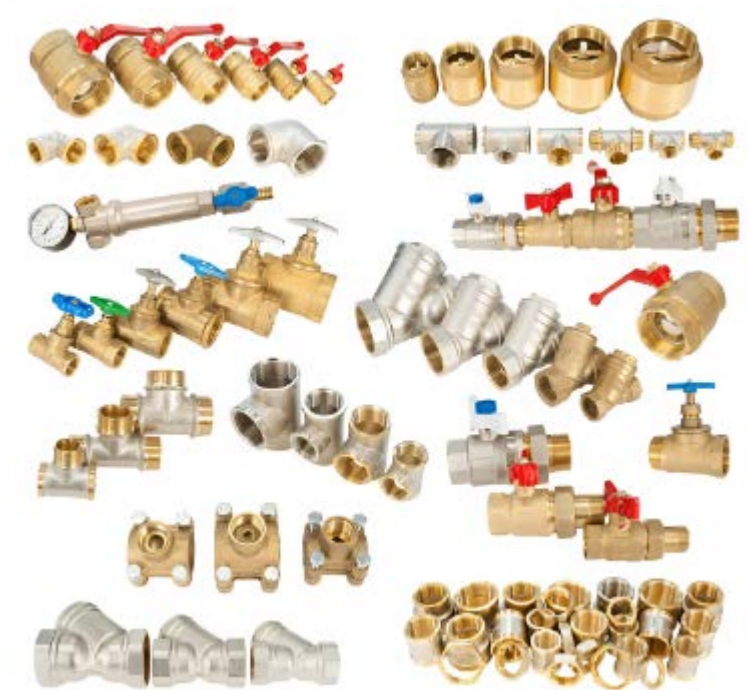

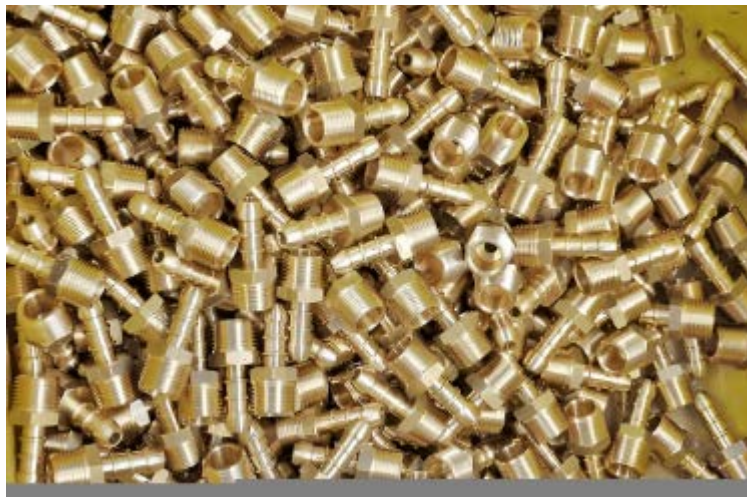

Utilizing cutting-edge equipment and technologies.

Strict Quality Control

Processes ensuring zero-defect outcomes every time.

Our Wide Range of Brass

Discover the extensive selection of precision brass items we manufacture, including round rods (2mm-50mm), hexagonal bars (5mm-50mm), hollow sections, rectangular and square profiles, as well as knurled and sheet metal components crafted with exacting standards. Each and every product manufactured with utmost care and precision with the help of skilled workers and efficient machinery.

BRASS HEX BODY AND SPECIAL HEX INSERTS

Brass Hex body and special Hex inserts

Hex-shaped brass parts and threaded inserts used in plastic and metal assemblies.

Utility:

They provide strong, durable threads in soft materials like plastic and wood, used in electronics, automotive, and furniture.

BRASS NICKEL PLATED TERMINAL

Brass Nickel plated Terminal

Brass terminals coated with nickel for extra protection.

Utility:

Used in electrical connectors and switches for better conductivity, corrosion resistance, and longer life.

BRASS RIVETS

Brass rivets

Small, cylindrical fasteners made of brass.

Utility:

Join two materials together permanently in leather goods, bags, electrical parts, and decorative items.

BRASS PIN MOULDING INSERTS

Brass pin Moulding inserts

Precision-shaped brass pins made via moulding processes.

Utility:

Used in electrical connectors, plugs, sockets, and electronic devices for secure, conductive contact points

BRASS FORGING COMPONENTS

Brass forging components

Brass parts shaped by applying pressure and heat (forging).

Utility:

Provide high strength and durability for plumbing fittings, valves, automotive parts, and industrial hardware

Industries we cater to

Automobile

Fittings, connectors, bushings with precision engineering required two wheelers and four wheelers vehicles as well as in vehicles for connectors, terminals, fuel systems, and sensors.

Defense

High-strength components for critical defense for application in military equipment for electrical connectors, ammunition parts, and precision fittings due to their durability and reliability.

Electrical & Shipping

Terminals, fittings and corrosion-resistant marine parts essential in switches, plugs, sockets, and terminals for excellent electrical conductivity and corrosion resistance.

Sanitary & Industrial

Valves, plumbing fixtures, and custom machine components used in taps, valves, pipe fittings, and water systems because brass is rust-free, long-lasting, and safe for water contact.

Manufacturing Capabilities

- 1 CNC as well as automatic machining
Precise turning, milling, and drilling for exact parts powered by CNC machinery.
- 2 Precision parts
Complex shapes produced at high volumes with quality manufacturing even at a precise level.
- 3 Timely delivery and quality in packaging
Excellence in logistics and quality in packaging that helps us cater products to world class companies.

Quality Assurance: Zero-Defect

ISO 9001:2015 certified system

IATF certification

100% inspection of every item

In-house quality check

Statistical Process Control monitoring

Highly equipped machinery

Decades of manufacturing goodwill

Z bronze certification

Why Shreeji Components?

Experience & Expertise

Over 30 years serving brass component needs across the worldwide.

Quality & Precision

Unwavering zero-defect manufacturing excellence with our skilled staff and unprecedented management

Custom & Competitive

Tailored solutions with on-time delivery with the use of industry level logistics and super efficient pricing on our items that are perfect for your company's requirements.
